To whom it may concern:

The Alpha Group, Inc. uses Coats Sequel for both our Sales & Accounting functions; we have been a loyal customer of Coats since the early 90's. We recently decided to add the Resume Parsing option and we have been extremely happy with the impact that Resume Parsing has had on our full cycle recruiting process. The feature of Boolean searching has allowed us to be more proficient in the identification of top talent for our clients. Resume Parsing is a real game changer for our company; the ease of use and the cutting edge technology allows us to quickly match applicants' skillsets with our client's productivity needs. New clients tell us they are impressed by the speed in which we are able to pre-qualify and deliver top-notch people. Clients use Alpha's services again and again because they know our recruiters and support team will consistently deliver excellent results. In this competitive climate, our company's excellent reputation, strong client relationships and our history of referring the best people translates into repeat job orders by our new and existing clients. We highly recommend adding the Resume Parsing option as part of your Coats solution. If you are looking to grow your client base and increase sales, Resume Parsing is a must have!

Christopher Lihzis

VP of Sales & Operations
